

Starlink for business, with a team around it.

We plan it, install it, back it up and watch it, so your people stay connected wherever the work is.

CUSTOM ENCLOSURES

Built around your site.

Routers, mounts, power and enclosures, tested before they ship.

Netcom enclosure - 3D reference assembly. Final equipment is selected for the project.

The equipment.
The power.
The connections.
Planned together.

01 / PLAN & INSTALL

Set up right.

Business plans and kits, configured for how you work. Our techs survey, mount and test every install, nationwide.

02 / CONNECT & BACK UP

A second path.

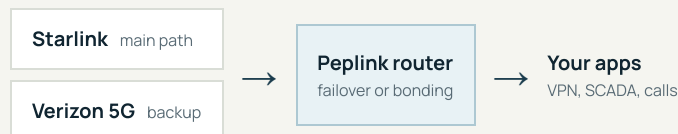

Starlink and Verizon 5G on one router.
Verizon 5G picks up when Starlink drops.

03 / MONITOR & SUPPORT

A team around it.

Every dish in Netcom Edge Portal. A named engineer and account manager, plus 24/7 network monitoring.

THE WHOLE SITE, BUILT AND INSTALLED

Netcom Edge Portal: every dish, alerts, NIA and reports.

WHERE THE WORK IS

Remote field sites. Keep SCADA and site data flowing from pads and stations.

Yards and branches. Starlink as the main line, 5G as the backup.

Mobile crews. Starlink and 5G on kits and plans made for travel.

Already on Starlink? Keep your dishes. We bring them under one account and have your alerts ready before you sign in.

Send us your sites.
We'll send back the design.
